Helfred Glory, right, with Helfred Princess Royal at the time they won the pair of calves class at the 1937 International. Helfred Glory was undefeated throughout that year and in 1938, was made junior champion at the American Royal Show. His calves show the same quality of conformation that made him a consistent winner. Helfred Princess Royal was never defeated in her first two years of competition. Note the large number of members of this prolific family that are included in this sale.

## Terms and Conditions

---

**TERMS**—The terms of this sale are cash.

**HEALTH**—Every animal over six months of age will have been tested for T. B. & Bang's disease within 30 days prior to the sale and a health certificate will be furnished that will allow shipment anywhere.

**GUARANTEE**—All animals with known defects have been carefully weeded out and discarded. Only regular producing, healthy animals will be offered as the extremely large percentage of healthy calves will indicate. However, as this is a dispersion sale, all animals will be sold at the halter with no additional guarantee.

We will not be responsible for any accident which may occur but we will use every precaution to provide for the comfort and safety of our guests.

Neither the Sale Manager nor the Clerk assumes any liability whatever in connection with this auction sale.

## About the Offering

---

This herd was founded by the late C. B. Miles, father of Tedford W. Miles and a thorough examination of the breeding to be found in this catalog will reveal that this foundation was established upon bloodlines universally accepted as the best.

Following the death of his father, Tedford W. Miles has continued his original program. Owing to the amount of detailed time and attention he must devote to his own profession however, Mr. Miles has decided to offer this entire purebred herd for sale. Its dissolution presents buying opportunities that cannot be equalled. No herd, in our experience, has ever been offered for sale that exhibited as much tangible evidence of profitable production and breeding health. Sixty cows will sell that already have or will have by sale time, rugged, dark-colored uniform calves at foot. The majority of these are sired by the 1938 American Royal junior champion, Helfred Glory. They show uniform excellence and should be the means of attracting boys from all parts of the cornbelt that want winning club calves.

As many as five generations of Miles breeding will be observed in the pedigrees of many of the younger females. This plus the good bulls and noted Scotch families represented serves to enhance their value wherever they go.

Let nothing prevent your attendance at this sale. You will profit most by making liberal purchases.

Clinton K. Tomson, Sale Mgr.

A few of the daughters of Helfred Blackwatch with calves at foot sired by the American Royal junior champion Helfred Glory. Rugged red calves from good type, choicely-bred dams make a money earning combination that cannot be equalled on the farm.

This catalog simply gives you complete facts and information relative to lines of breeding, calving and service dates, etc. You will find that footnotes have been omitted as we feel you will agree that the animals will speak for themselves.

In-as-much as it is possible, the catalog order will also determine the selling order of the animals by lots.

These Shorthorns have been handled under the most practical of farm conditions. Outdoor, normal lives have added to their years of usefulness. In other words, these young cattle are in ideal condition to continue to return profits to new purchasers.

The fifty-eight pedigrees that follow represent individuals that have already calved in 1941 or will calve by sale date. Study them carefully and decide to buy from one to a carload in this great dispersion sale.

# THE HOPE OF AMERICA

The future of American agriculture depends upon the type of live stock bred on our farms and upon the young men who are to provide both leadership and management of all farm activity. Combinations like the one pictured above serve to illustrate how many practical-minded parents are providing their sons with purebred heifers that help to hold and to arouse interest in agriculture.

Many of the nation's best herds have been founded upon small units of two or three purebred heifers. College educations have been made possible and home educations made more complete through moderate investments in purebred Short-horn heifers.

The Shorthorn production features so forcibly illustrated in this picture have been largely responsible for the general adaptation of the title, "THE FARMER'S COW." How would you like to have cows like this on your farm?

## QUICKER AND SURER PROFITS

The next 33 lots represent a most attractive group of females, most of which are extremely close to calving with the remainder bred to calve in early fall. Investments in breeding females of this age insures quicker turn-over, more rapid profits and added security.

Shorthorns on the Miles farm will be found to show the same characteristics of milk and beef production illustrated above. The cows and heifers included in this sale will enable carlot purchases of uniform, heavy producing females. The kind that pay as they go. No corn-belt farm can profitably be without them.

A snapshot picture of a group of open heifers that are included in this sale. Heifers that develop as these must be backed by quality breeding. Strictly average farm conditions plus choice ancestry are responsible.

## Twenty Open Heifers

---

The next twenty lots include a most attractive group of young females right up to breeding age. Many heifers are included that merit the attention of breeders interested in securing choice individuals for replacement or foundation purposes.

The colors, dark reds and even roans, represent the general pattern of the entire offering. Start your boy with a good heifer and you will strengthen his interest, his enthusiasm and his belief in agriculture.

**Helfred Glory 1882831**—Can rightfully be called one of the most promising young Iowa sires. His showyard record was outstanding, being undefeated as a calf and junior champion at the 1938 American Royal. His biggest claim to fame, however, comes from the unusually large number of choice, even colored red-and a few roan-calves sired by him. Helfred Glory is still in his prime. Someone will buy an outstanding sire in Helfred Glory.

## THE VITAL ELEMENTS IN CORN & HOGS GO TOGETHER

✓ A hog is made up of approximately 57% Water, 25% Fat, 15% Lean and 3% Minerals.

✓ Corn is made up of approximately 67.6% Carbohydrates, 14.8% Water, 9.6% Protein, 4.8% Fat, 1.9% Fiber, and 1.4% Mineral.

✓ NOTICE that corn is 1.6% deficient in minerals. A mineral shortage also occurs in wheat, barley, rye and other home grown grains and must be made up from other sources.

### ADD MINERALS THE WALNUT GROVE WAY

OUR COMMON SENSE WAY of feeding is being used by thousands of successful feeders. It allows you to feed your own home grown grains and to use just enough WALNUT GROVE minerals to help balance your feeding ration. The saving in corn more than pays for the cost of the WALNUT GROVE minerals. The secret lies in the way you feed. It won't OBLIGATE YOU to get the facts—fill in the coupon for free information.

Ellersbrock, Laurel, Iowa, held at Marshalltown, Iowa, May 27, brought out a good attendance of breeders from all sections of Iowa, with a few out-of-state buyers. The top of the sale was \$240, paid for Star Blanchard 8th, a son of the International first prize winner, Don Blanchard 55th, which went to E. M. Byer, of Belle Plaine. **WHY DO YOU FEED  
YOUR PIGS**

**Acme  
Plus?**

**FEEDER SMITH:** Because Acme Plus is a combination of quality proteins and I must add correct proteins to feed a balanced ration.

**FEEDER JONES:** But, it costs more than Old Reliable Acme.

**FEEDER SMITH:** Not much—only 10c per pig from birth to maturity.

**FEEDER JONES:** Why 10c more?

**FEEDER SMITH:** That's the small amount you pay for the nicotinic acid and other special food elements added.

**FEEDER JONES:** Why are they added?

**FEEDER SMITH:** A leading experimental station says: "Necro is likely to develop, or not to develop, depending on the nature of the food supply." Nicotinic acid and the other food elements help fight Necro. You know, losses from
